Subject: proposed e-mail package: Strategic Performance Measure Status for California
Attachments: Letter.SPM results_2018Q3_CA.docx; OBI-SFDW_Health Based Violations by PWS_CWS_CA_SY2018Q3.xlsx; SPM1 trend_CA_2018Q3_v2.pdf; SPM1 trend_US-R9_2018Q3.pdf

Darrin,

During our May 10, 2018, call with the Region 9 drinking water program directors, we discussed the new Strategic Performance Measure (SPM) for the national drinking water program, which specifies a 25% reduction in the number of Community Water Systems (CWSs) with health-based violations by the end of FY2022. On that call I committed to providing updated lists of the CWSs with health-based violations and the SPM results for each primacy agency, Region 9, and nationally, on a quarterly basis. This message transmits the list of California CWSs with health-based violations for FY2018Q3 and the three charts. I am also sending printed copies by mail.

Regarding California's current SPM status, data through June 30, 2018, from the October 2018 SDWIS Federal Data Warehouse shows a 13% reduction compared to the SPM baseline (FY2017Q3). This compares to a 1% reduction over the same period for all CWSs nationwide. During our regular management meetings, we will plan to discuss your progress and projections for meeting the SPM to include the state initiatives and proposed approaches that you identified as part of our joint effort to improve small system compliance.

Regards,

Corine Li, P.E.
